Get ready for work.

PROTECTION & COMFORT

METAL-FREE, WATERPROOF BOOT WITH INTERNAL METATARSAL PROTECTION

REFLECTIVE EFFECTS

Feature reflective panels help improve safety of the workforce in dark environments.

BLACK SMOOTH WATER RESISTANT LEATHER

Durable, comfortable and easy to clean and maintain. Full waterproof protection.

UPDATED STYLE HARDWEARING DUAL DENSITY PU RUBBER SOLE

Slip Resistant to the SRC rating, and Antistatic, the popular hardwearing rubber sole on the Airlite Met-Guard boot has been recently updated with smart red insets.

COMFORT FOOTBED

Designed to maximise comfort for the wearer.

UPDATED STYLE WATERPROOF MEMBRANE LINING

The fully-waterproof lining will keep the wearer comfortable and dry in demanding weather conditions. Now with a new red mesh update.

PADDED TONGUE WITH INTERNAL 'PORON XRD' METATARSAL PROTECTION

Flexible under normal conditions, Poron® XRD foam instantly hardens on any sudden high impact - creating a protective shield that absorbs the impact, and yet remains comfortable and non-restrictive as it returns to its resting state.

UPDATED STYLE IMPROVED TPU SCUFF CAP

A new and improved TPU scuff cap provides additional protection against wear and tear, especially for wearers who may crouch to carry out their work.

200 JOULES COMPOSITE TOE CAP

This composite material absorbs impact, protecting the wearer better than steel, which dents inwards and can lead to fractures.

With over half a million workplace injuries in the UK a year and foot injuries a contributing factor, it is essential for employers and employees to make the right footwear protection decisions.

Foot injuries especially can be expensive, often a several thousand pound claim, with many hidden and uninsured costs.

Don't let the trauma and costs of an injury become your motivation for better foot protection... When you can prevent it with little cost to anyone by using Airlite boots!

This range of footwear, exclusively designed and supplied by HeathBrook, demonstrates our commitment to meeting the challenges of working in a public environment with specific safety and security demands.

Especially designed with demanding airport requirements in mind.
